Aryan Singh

Product Designer I UX/UI Designer

Detroit, MI I (734) 747-4892 I aru24sin@gmail.com I linkedin.com/in/ary-sin24 I aru24sin-portfolio.netlify.app I US Citizen

SUMMARY

Product designer who builds what I design. I own design from user research through launch, turning user needs and product requirements into user flows, prototypes and production-ready interfaces, then build them in React, React Native and Angular so the shipped product matches the design. Redesigned a mobile app to 94% usability-test task completion after its first design failed testing, and designed, built and launched a paid macOS app on my own.

EXPERIENCE

AAA - The Auto Club Group I *Applications Associate, ACG AI Labs* Apr 2026 - Present

- Own design for an enterprise platform used by senior leadership from exploration through launch, translating product requirements into user flows, wireframes, prototypes and production-ready interfaces.
- Design modular layouts and sharing workflows that let non-technical users tailor the product to their needs.
- Lead design reviews with Product, Engineering and business stakeholders, explaining design decisions and tradeoffs to align on direction before build.
- Build approved designs in React, TypeScript and Angular so the shipped product matches design intent.
- Develop AI-powered automations in Power Automate and AI Builder that process about 3,000 documents a month, saving about 397 hours of manual work.

AAA - The Auto Club Group I *Innovation Team Intern* May 2025 - Jan 2026

- Led the full UX process, turning user interviews and UserBrain usability tests into interactive Figma prototypes.
- Built a reusable design system of components and shared interaction patterns that sped up developer handoff.
- Launched several products from concept to responsive Angular web app, validating with users at each stage.
- Rebuilt a legacy robot's AI system on cloud-hosted models, cutting response time from 2-3 minutes to 10-15 seconds.

Frogwatch - Friends of the Rouge (Client Project) I *Team Lead, UX Designer & Developer* Jun 2025 - Mar 2026

- Led a 4-person team to design and ship an AI frog-call identification mobile app for citizen-science volunteers.
- Redesigned core flows after the first design failed user testing, then won approval from testers and the client.
- Achieved 94% task completion, 2.1 taps on average to start a recording, and 8.2/10 tester satisfaction in usability testing.
- Built the app in React Native with Firebase, connected to an AI service that returns results in under 2 seconds.

AAA - The Auto Club Group I *API Developer Intern* Jan 2026 - Apr 2026

- Built and integrated 30 REST APIs on Google Cloud Apigee across dev, QA and production, shipped through Jenkins CI/CD.

PROJECTS

Sfumo I *Product Designer & Developer (independent macOS app)* I aru24sin.github.io/sfumo 2026

- Designed, built and launched a macOS menu bar app that blurs every window except the one in use, sold through Stripe.
- Designed the interaction model, name, icon and product site, including an interactive demo and a first-launch walkthrough.
- Chose an approach that needs no system permissions, removing the main trust barrier for a new utility.

Gesture Portfolio I *Interaction Designer & Developer* 2026

- Built a portfolio controlled by hand gestures through a webcam (in-browser hand tracking), with mouse and keyboard fallbacks.
- Diagnosed and fixed a timing issue that stopped gestures working on slower computers.

EDUCATION

University of Michigan - Dearborn I B.S. in Computer Science, AI Concentration I GPA: 3.56 Dec 2025

Undergraduate Researcher, SURE 2024 (May - Sep 2024): benchmarked AI-image detection models (CNNSpot, ResNet50).

LEADERSHIP

Artificial Intelligence Club, UM-Dearborn I *Co-Founder & President* Jan 2024 - May 2025

- Grew the campus AI Club to 200+ members with workshops, guest speakers, a newsletter and a tech tournament.

SKILLS

Product Design: User Flows, Wireframes, Prototypes, Interaction Design, Visual Design, Design Systems, Accessibility
Research & Validation: User Interviews, Usability Testing (UserBrain), A/B Testing, Research Synthesis, Information Architecture
Design Tools: Figma (Auto Layout, Components, Design Tokens), AI-Assisted Prototyping (Claude, Cursor)
Front-End & Languages: React, React Native, Angular, TypeScript, JavaScript, HTML5, CSS, Swift, Python, Java, SQL
Platforms: Git & GitHub, Firebase, Google Cloud, REST APIs, Power Automate
