Summary

Frontend-focused software engineer building responsive, high-quality user interfaces in React, TypeScript, and Angular, backed by a strong UI/UX foundation. I turn Figma designs into polished interfaces, optimize for performance across devices and browsers, and integrate closely with backend APIs. Comfortable in fast-moving teams and contributing to frontend architecture decisions.

Education

University of Michigan - Dearborn

B.S. in Computer Science, AI Concentration

Dearborn, MI

Dec 2025 GPA: 3.56

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Databases, Deep Learning, Natural Language Processing, Artificial Intelligence, Computational Learning

Professional Experience

AAA - Auto Club Group

Applications Associate, ACG AI Labs

Dearborn, MI

Apr 2026 - Present

- Build responsive, high-quality front-end applications in React, TypeScript, and Angular, taking designs from concept to production.
- Collaborate with design and product to turn UI/UX designs into polished interfaces, and integrate with backend APIs for end-to-end functionality.
- Optimize applications for performance and usability, and contribute to frontend architecture decisions.

Innovation Team Intern

May 2025 - Jan 2026

- Directed UI/UX end to end: ran user interviews and usability tests in UserBrain, designed interactive Figma prototypes, and built a reusable design system for developer handoff.
- Launched 0-to-1 responsive web apps in Angular 19, taking concepts from prototype to production.
- Improved responsiveness of a real-time system, cutting user-facing latency from 2–3 minutes to 10–15 seconds.

API Developer Intern

Jan 2026 - Apr 2026

- Built and integrated 30 REST APIs across dev, QA, and prod, the backend layer front-end applications consumed.
- Debugged issues across the stack and shipped changes through Jenkins CI/CD pipelines.

FrogWatch - Friends of the Rouge

Team Lead & Frontend/Integration Developer

Dearborn, MI

Jun 2025 - Mar 2026

- Led a 4-person team building a responsive cross-platform front end in React Native (Expo), with Firebase Authentication, Firestore, and Cloud Storage.
- Integrated backend APIs (FastAPI on Google Cloud Run) into the UI, returning real-time results in under 2 seconds.

University of Michigan - Dearborn (SURE 2024)

Undergraduate Researcher (Data & ML)

Dearborn, MI

May 2024 - Sep 2024

- Evaluated machine-learning models (CNNSpot, ResNet50) under Dr. Li on large datasets, measuring quality with confusion matrices and ROC curves.

Leadership

Artificial Intelligence Club, UM-Dearborn

Founder & President

Dearborn, MI

Jan 2024 - May 2025

- Founded and led the campus AI Club, running workshops, guest speakers, and a newsletter and presenting to students.

Skills

Frontend: React, React Native, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS, Figma, Responsive & Cross-Browser UI, UI/UX Research

Languages: TypeScript, JavaScript, Python, Java, C/C++, C#, SQL

Backend & Tools: Node.js, REST APIs, FastAPI, Git & GitHub, CI/CD, Google Cloud, AWS, Firebase
